

#### **EXC-B175BBH** LED Flood Light

Application Environment: Indoor Outdoor

### **Description**

EXC-B175BBH series consists of triangular full-color flood lights with high-strength aluminum alloy housing specially designed by EXC for outdoor landscape lighting. It could be used for illumination in specific areas or landscape wash lighting, applicable on building facades, bridges, stages, etc.

#### **Features**

- The newest generation technology: DMX512 parallel bus design
- High strength aluminum and low thermal resistance path cooling design
- High reliability modularization design
- Outdoor lighting protection and electrostatic discharge (ESD) protection design
- Load safety design
- Projection distance: 30-100m

| Basic Specifications   |   |  |
|------------------------|---|--|
| Color Range            | W(2200K-6500K), R+G+B, R+G+B+W, RGBW                            |  |
| Working Voltage        | AC 220V   |  |
| Max. Power Consumption | 200W/240W/300W  |  |
| Light Source           | 72/96/144 PCS High Power LEDs                                   |  |
| LED chip Brand         | Optional(Cree, OSRAM, Lumileds, Epistar, etc)                   |  |
| CRI                    | 80  |  |
| Control                | DMX512, ON/OFF  |  |
| Source Life            | 50,000 h  |  |
| Housing                | High Strength Aluminum  |  |
| Cover                  | Tempered glass  |  |
| Weight                 | 18.86Kg   |  |
| Dimensions             | 624mm x 371.5mm x 287.7mm (L x W x H, exclude Mounting Bracket) |  |
| Installation           | Installation with screws  |  |

## **Installation Diagram**

1. Select four M10 screws to fix the lamp to the required position as shown in the figure. After the lamp is firmly installed, adjust the angle of the lamp according to actual needs and then lock the connecting screws.

#### System connection diagram:

- 1. Host controller should connect with slave controller. Working voltage for controllers are AC220V.
- 2. On-line main controller should connect with slave controller, on-line main controller and sub controller working voltage are AC220V.
- 3 each sub-controller with 8 ports, with each port 512 pixels, supporting data converter, supports 100 meters ultra-long haul transmission.
- 4. The CAT-5 e. cable distance should be within 100 meters between host controller and slave controller, between slave controllers and switch, etc.
